

Access**EMR** NURSING HOME

**The Right Care, to the right patient,
at the right time.**

AccessEMR's Nursing Home software is a cloud-based electronic medical record system (EMR).

AccessEMR is proven to effectively manage both your day-to-day clinical and business duties to improve compliance with operational processes.

Our ultimate goal is to reduce the time and tasks needed for a nurse to do his or her job optimally, so they provide the patients the quality of care they deserve.

FOR NURSING HOME EXECUTIVES

AccessEMR Nursing Home places a cloud-based, high-performance EMR directly into your hands. As a nursing home executive, you understand that time is at a premium. AccessEMR provides you with:

- Centralized cloud-based patient information
- Up-to-date patient information auto-updates
- Historical data at your fingertips
- Built-in notifications & alerts

FOR FRONT-LINE NURSING STAFF

AccessEMR is proven to effectively manage both your day-to-day clinical and business duties to improve compliance with operational processes. More importantly, AccessEMR improves your nursing home care for happier, livelier patients through:

- Streamlined process optimization
- Integrated interoperable (HL7 Standardized) EMR
- In-the-cloud updates and offline synchronization

FOR PATIENT AND FAMILY

Nursing Home patients and family expect the best in care, security, health and well-being. AccessEMR provides a centralized:

- Family information portal
- To-the-minute information sharing
- Automated electronic prescriptions
- Streamlined processes

THE ONLY EMR

YOU'LL EVER NEED
