

Environmental Public Health Compliance Collaboration for Adult Care Facilities

X Inc Canada Ltd. provides specialized auditing and consulting services in the field of Environmental Public Health (EPH) to major companies in Canada. We are a team of highly qualified EPH specialists with a minimum of 25 years of auditing, consulting, and management experience.

Our specialists can assist you in ensuring compliance with local, federal and international legislation and standards to avoid infectious diseases outbreaks, facility closure by local authorities, damage to your company reputation, etc.

Our EPH specialists will conduct gap analysis and recommend best practices, procedures, continuous improvement planning, and support with targeted training to ensure ongoing compliance.

We will:

- Conduct baseline audits of the food, residential and hydrotherapy facilities, and the common areas of the facilities. Also included are beauty salons, daycares, and playgrounds, if present.
- Reference the findings to the current legislative standards and “best practices”, and then generate a gap analysis.
- Generate facility specific reports based on the audit findings and include recommendations for corrective actions to achieve compliance where applicable.
- Perform quarterly, semi-annual and/or annual audits of the facilities to ensure ongoing compliance and achievement of best practices.
- Provide food safety, housekeeping, and infection prevention and control courses as required by local health authorities for food handlers and care providers.
- Assist client with procedures and protocols for:
 - ✓ Food safety, housekeeping and infection prevention & control monitoring programs
 - ✓ Incidence response and food recall response management
 - ✓ Infectious disease (including food and waterborne) outbreak management
 - ✓ Other related issues as appropriate

We are the only independent, privately owned company in Canada that provides a complete portfolio of consulting and auditing services to major multi-service Adult Care Facilities. We will assist you in implementing global best practices.

We currently conduct third party audits of contractors who provide multi-faceted services to Adult Care Facilities, Educational Institutions, Oil & Gas Work Camps, and Restaurant Franchises serving hundreds of people daily.

Contact us and we will provide a no obligation proposal for your organization.
