UNIVERSITY OF CALGARY

**The O'Brien Institute for Public Health &
the Department of Community Health Sciences present:**

Helping Coder's Get More out of the World Health Organization's ICD-11 through Human Factors and Education

Speakers: Nishan Sharma and Greg Hallihan

Friday, March 1, 2019 - 12:00 to 12:50 p.m.
G500 - Health Sciences Centre, 3330 Hospital Dr NW

This presentation will discuss the significance of the WHO's International Classification of Diseases, providing perspectives from regional to global, operational to clinical. A project evaluating the Usability of the WHO's ICD-11 web platform will be presented, with a focus on answering questions like 'What is Usability', 'Why would the WHO care about Usability' and 'What has Usability done for us lately'?

Objectives:
1: Explain the purpose of the International Classification of Diseases
2: Explain how ICD-11 is used by Healthcare Practitioners
3: Understand how Human Factors evaluations can support the design and implementation of software, using ICD-11 as an example.

This event is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada. **This seminar is also available via an online AdobeConnect session:** To attend the seminar from another location via your computer, click on this link:
